

Proactive Updates

Automated, Ongoing License Status Updates

Proactively track licensure updates in your customer universe to ensure compliant commercial operations and minimize risk.

Based on your configurable business rules, Proactive Updates empowers continual tracking of a Healthcare Practitioner's (HCP's) key licensing and demographic data attributes in your CRM/MDM universe to streamline ongoing data management and eliminate the need for manual refresh of records.

Configurable Tracking

Choose from over 300 distinct licensing and demographic data elements associated with each HCP for ongoing monitoring and proactive return.

Flexible Data Returns

On a weekly, monthly, or custom basis, a file will be proactively created, flagging all data changes for HCPs in your tracking environment.
