# WebServicesID®

Integrated Healthcare License Database and Data Capture

Search, verify, and add authoritatively sourced healthcare licensing data directly within your internal systems to drive streamlined compliance and commercial operations.

WebServicesID eliminates the need for legacy systems, disparate databases, and manual lookups, proving a centralized, single source of truth for improved data governance.

Powered by MedProID®, quick-search and capture key licensing and demographic data attributes for all US-based Healthcare Professionals (HCPs) and Healthcare Organizations (HCOs) for integrated shipping and product distribution management, HCP and HCO engagement, CRM & MDM data capture, and more.

Instant Verification

Confirm the eligibility of HCPs and HCOs for commercial operations and product distribution against their professional designation, license status, and sanction lists – essential for compliance with Aggregate Spend/Open Payments, Corporate Integrity Agreements (CIAs), Deferred Prosecution Agreements (DPAs), DSCSA, PDMA and more.

Quick-search and Filter by Detailed Profile Attributes

Easily find via name, address(es), specialty, licensing status, and key attributes from every major Federal, State, and Medical Association dataset:

- State License Number (SLN)
- National Provider Identifier (NPI)
- Covered State Recipient ID
- Controlled Drug Substance Numbers (CDS)
- Health Industry Numbers (HIN)

Embedded Data Remediation

Enable users to view, capture, and append missing key identifiers and demographic data attributes to existing customer records, eliminating manual entry.

30+
million record healthcare license database

30+
years of experience supporting the Life Sciences Industry

"Without a doubt, way better than what we had before. The data we had was so incomplete.

- Vice President, Sales Operations"
