

# Massachusetts Updates to MCSR & SLN Data Validation

## What You Need to Know

### Who is Impacted?

Pharmaceutical manufacturers and distributors shipping prescription drugs or providing samples to MA HCPs

### The Changes

Massachusetts has transitioned their license data to a new platform to publish professional license (MA SLN) and all Massachusetts Controlled Substance Registration (MCSR) information. This changed data availability, creating complexity around data acquisition and storage, and highlighted Massachusetts regulations around prescription drugs.

### Key Takeaway

In Massachusetts, ALL prescription drugs are considered a "controlled substance".

To prescribe, request, or receive prescription drug samples or products, the MCSR and MA SLN are required.

**Note:** The MCSR is location specific, and an individual licensee may hold multiple MCSRs.

### PRESS RELEASE

**MedPro Systems Aligns with the MA Department of Public Health to Enhance Prescription Drug Compliance Resources**

### How MedPro Can Help

We are working with our customers to provide:

- Insight directly from the state of MA on evolving changes and how to address gaps and anomalies in the data
- Proactive Monitoring
- Quality Checks
- Review of Data
- Associated SLN and MCSR data to ensure complete license verification
- Education sessions to improve compliance strategies for our customers
- Ongoing data delivery and support

As these changes evolve, MedPro will continue to evaluate the MA SLN and MCSR data for our customers who require Massachusetts prescribers' practice and MCSR licenses for their compliance and business objectives.

### Who Needs MCSRs?

*MCSRs are issued to individual prescribing type professions (HCPs):*

- Medical and Osteopathic Physicians (SLN on different site)
- Physician Assistants
- Dentists
- Podiatrists
- APRNs
- Veterinarians (SLN on different site)
- Collaborative Drug Therapy Management

*MCSRs are issued to facilities (HCOs):*

- Clinics
- Distributors
- Hospitals
- Manufacturers
