

**A Full-Service Partner for
All Your Transparency Needs**

End-To-End Global Transparency Coverage

In recent years, MedPro has observed transparency requirements growing increasingly more complex around the globe. During this time, the company listened to customers, learned about their experiences, and identified needs that weren't being met in the marketplace.

Our global disclosure platform offers you a holistic, scalable, integrated transparency coverage supported by a dedicated, nimble, forward-looking team of regulatory and industry veterans.

MedPro developed a single, end-to-end solution for global transparency coverage that can serve businesses as they grow and change, in the US and abroad. It is delivered by the same team that is responsible for roughly 30% of all CMS disclosure in the US and growing.

Paired with our in-house regulatory & technical expertise, we're able to offer rapid deployment of a proven solution with dedicated support across the life of the contract you can rely on year after year.

"It has been an absolute pleasure working with the Medpro team over the years. Your solutions, knowledge and support have provided us with invaluable assets for ensuring accurate and timely reporting to meet our disclosure obligations."

- Vice President, Transparency & Compliance

US Transparency Reporting

Streamlined capture of all Covered Recipient data to meet Federal Open Payments (Sunshine Act), State, and Local obligations with integrated analytics & threshold monitoring.

International Disclosure

Centralized data governance for 50+ countries with an intuitive and user-centric workflow and unlimited scalability to meet the disclosure needs of industry leaders and startups alike.

RegulatoryID Reference Library

Access the authoritative global transparency compendium of all regional and industry association-based disclosure requirements for navigating the evolving global disclosure landscape with ease.

MedPro Compliance Advisory Services

Tailored regulatory support to streamline compliance, delivered by industry experts with real-world experience who help you manage risk while empowering your business to move forward.
